Summary

Fourth-year B.Tech Computer Science and Engineering student with hands-on experience in Python, JavaScript, C++, SQL, web development, automation, RPA, and application integration. Built projects using React, Firebase, REST/API integration, IoT hardware, and blockchain technologies, with practical experience in development, testing, deployment, and collaborative engineering. Strong foundation in problem-solving, software development, databases, automation workflows, and computer science fundamentals.

Education

B.Tech – Computer Science and Engineering, B.Tech – Computer Science and Engineering (IoT, Cyber Security & Blockchain Technology), MGM University, School of Engineering and Technology, Chhatrapati Sambhajinagar (2023 – 2027). CGPA: 9.23

Technical Skills

Programming Languages: Python, C++, JavaScript, SQL
AI/ML & LLM: Machine Learning Fundamentals, Generative AI, Large Language Models (LLMs), Prompt Engineering
Backend & API Development: REST APIs, API Integration, Firebase Authentication
Data Structures & Algorithms: Data Structures, Algorithms, Object-Oriented Programming (OOP)
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS
Databases: MySQL, Relational Databases
Tools & Technologies: Git, GitHub, VS Code, Postman, Vercel
Soft Skills: Problem-Solving, Analytical Thinking, Teamwork, Communication, Adaptability.

Projects

PROPACCURA – Tenant-Landlord Management Platform

- Developed a web-based tenant-landlord management platform with dashboards, authentication, document handling, rent/payment workflows, and user data management.
- Implemented React-based UI, Firebase Authentication, API integration, SQL-oriented data handling concepts, and deployment through Vercel.
- Integrated UPI/cash/bill/UTR payment workflow concepts to support practical rent-management use cases.

IoT Automatic Water Pump Control Panel

- Built an IoT-based automatic water pump control system using two ESP8266 boards, float sensors, relay/control circuitry, and a physical switch.
- Implemented water-level based control logic with low-level ON and high-level OFF conditions and designed the system for communication across approximately 60 feet.

Blockchain Academic Certification Verification System

- Developed a blockchain-based academic certificate verification project to improve the integrity and verifiability of academic credentials.
- Applied blockchain concepts to create a tamper-resistant verification workflow for academic certification data.

Experience

Intern - Python Developer | Cognifyz Technologies| Remote | Jun 2025 – Jul 2025

- Worked on Python development tasks and practical programming projects in a remote internship environment.
- Applied Python programming, problem-solving, data handling, and software development concepts to assigned tasks.

Intern - Web Developer | Code Tech | Remote | Jun 2025 – July 2025

- Worked on web development tasks involving frontend implementation and application functionality
- Applied HTML, CSS, JavaScript, and web development concepts while working on assigned projects.

Google Student Ambassador | Jun 2025 – Nov 2025

- Supported student-focused technology activities and helped promote technical learning and community engagement.

Achievements

- **2nd Place – Enduraverse'26 National-Level Hackathon:** Developed a low-cost Smart Thermal Inspection Glass using computer vision.
- **Special Sponsor Award – TechSprint 2026:** Recognized at GDG On Campus hackathon.
- **1st Place – Web Development Competition:** MGM University (HTML, CSS, JavaScript).
- **Academic Excellence Award:** Secured 1st Rank in Academic Year 2024–25, SoET.
- **Google Student Ambassador (Jun–Nov 2025):** Supported student technology activities and community learning.
- **AWS Academy:** Cloud Practitioner Essentials.
